THE ROLE

- Identify innovation opportunities and become a trusted technology advisor to the Senior Management Team.

- Work closely with all departments in the Bank to ensure the technology strategy meets the long-term business strategy, which is built on digital delivery of consumer and commercial banking services.

- Will have primary responsibility for banking productivity applications, including development of CRM solutions.

- Manage the internal data environment as well as provide and support reporting or other data analytics solutions.

- Work closely with the Bank's technology partners to ensure a consistent approach to banking technology.

- Measure, review and report on the technology performance of the bank against approved operating

THE ROLE

- plans as well as report on the execution of technology investment budgets.

- Ensure compliance with policies and procedures on all IT operations, including in particular back-ups and disaster recovery procedures.

- Drive alignment between business and technology in order to maximize return on technology investments.

- Provide leadership to the ICT team to ensure it is accountable for all technology supporting the businesses.

- Drive and embed a strong performance culture through inspiring, motivating and rigorous performance management discipline.

THE CANDIDATE

- Good understanding of processes in the banking industry plus general knowledge of the regulatory environment shaping the industry.

- Ability to work with vendors and internal organization.

- Demonstrated ability to delivery product innovation and improved user experience.

- A strong internal network, providing the ability to navigate Global Technology and identify existing solutions for the business.

- Expertise in industry innovation and the ability to think strategically about how to create business-led solutions.

THE CANDIDATE

- University Degree in IT/Computer Science or software engineering.

- Extensive experience with core banking solution implementation, with a proven delivery track record in similar roles and complexity.

- Experience in the T24 Banking solution and in the complete cycle of the Data Migration activities will be an added advantage.

- Solid experience in IT transformation projects.

- Pragmatic and hands on approach to problem resolution.

THE CANDIDATE

- Knowledge of data analytics and data management tools and processes.

- Knowledge of software development management of outsource development contracts.

- Strong project management skills and management of development, maintenance and support teams.

- Up-to-date with the current (and future) levels of IT security, threats, vulnerabilities that could impact the Bank's digital and financial assets responsibilities.

- Strong interpersonal skills.
