

## **Background**

Partners for Health Services and Research Foundation (PHSRF) is a non-governmental organization (NGO) that originated from the demand-driven reasons for saving lives of Tanzanians. Formed out of former Angaza Zaidi program, a countrywide HIV and AIDS prevention and sensitization program under USAID that was implemented since 2001, PHSRF has accumulated over 15 years of hands-on experience in implementing HIV and AIDS, STI and TB prevention, sensitization and awareness raising projects across the country. PHSRF has also accumulated experience in gender mainstreaming in projects and have worked with Government of Tanzania in developing Gender Based Violence Training package. Our vision is "A world with vibrant communities who enjoy good health" while our mission statement is improving health and quality of life for every Tanzania by empowering community from within and supporting them to put knowledge into practice. PHSRF staff are highly trained and experienced in implementing research, Tuberculosis prevention and management, gender issues, HIV prevention and sensitization interventions, key population specific interventions, community-based interventions, communicable disease (CD) and non-communicable diseases (NCD) in workplace and communities.
